

 **LMS PORTALS**

LMS Portals Overview

LMS Portals provides a cloud-based, multi-tenant Learning Management System (LMS) that allows our clients and partners to launch and manage any number of customized learning environments (portals) on-demand.

Leveraging this multi-tenant architecture ensures that each of your different training audiences is offered a customized experience that supports their unique training needs.

01

Features

Multi-Tenant Architecture for On-Demand Portals

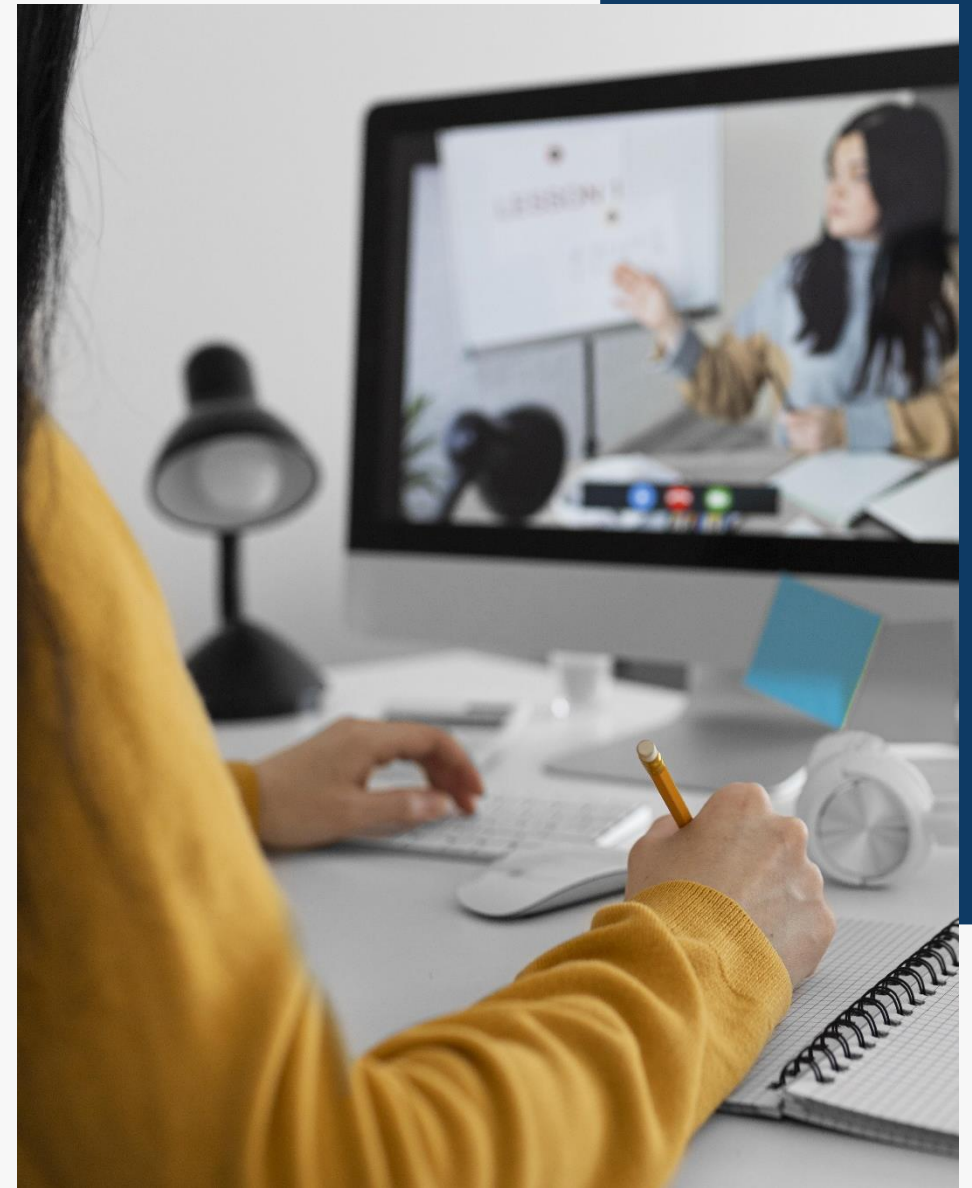

Launch new training portals on-demand to support each of your unique training audiences, such as corporate clients, channel partners, suppliers, disparate groups of employees, and more.

02

Features

Rapid Course Development Engine

Build and deliver online courses, quickly and easily.

03

Features

Learning Paths Engine

Add structure to your learning by putting individuals or groups of users on designated learning paths.

04

Features

Live Training Module

Zoom integration to include live training sessions to complement or support on-demand training.

05

Features

Certificate Builder

Reward your users for course or learning path completion by offering customized certificates for their learning achievements.

06

Features

Robust Reporting

Generate detailed reports to monitor user engagement and performance.

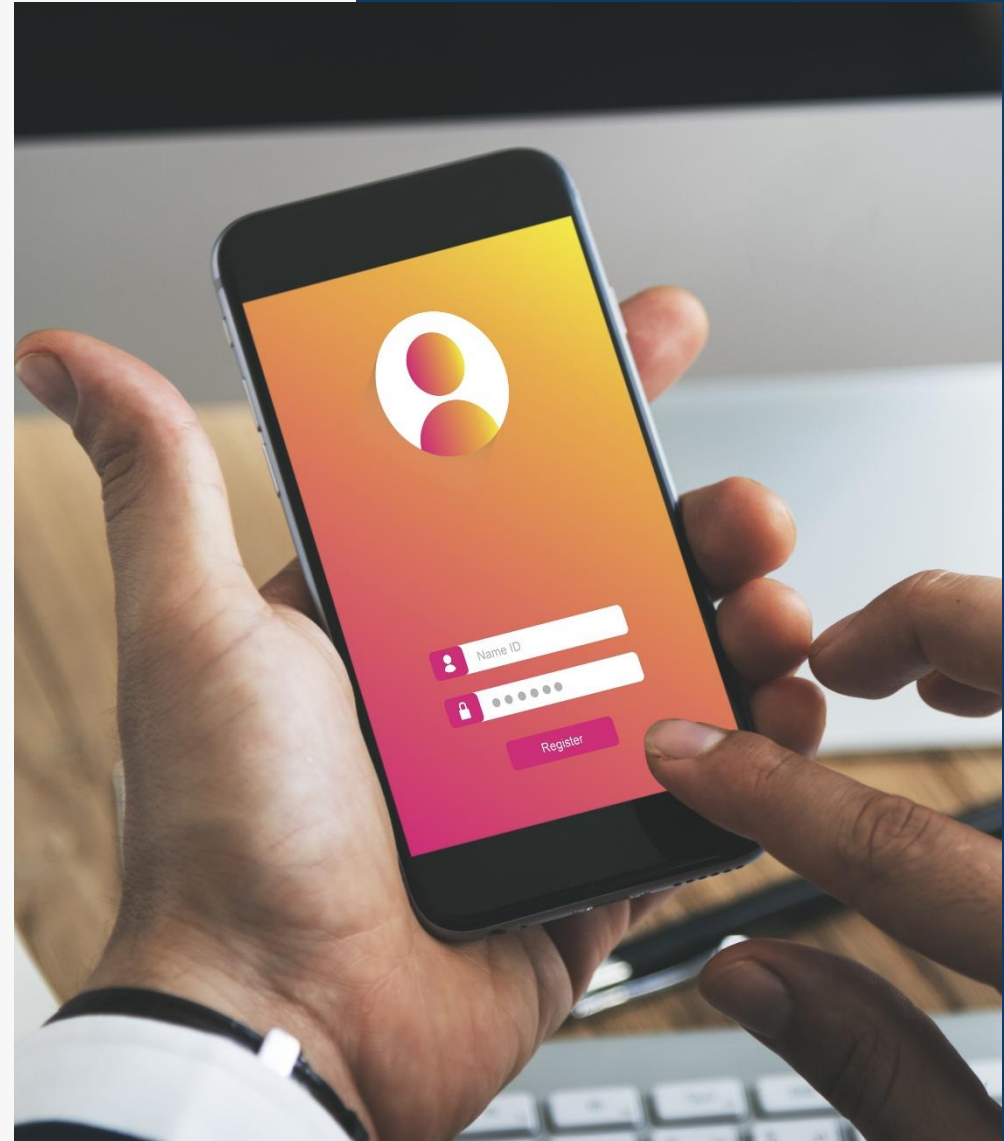

07

Features

Powerful Security

State-of-the-art security to protect your user identities and intellectual property
